CROP FINAL ESTIMATES

USDA's National Agricultural Statistics Service (NASS) has published final estimates for Crop Values, Field Crops, Potatoes and Sweet Potatoes, and Stocks of Grain, Oilseeds, and Hay, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2007 through 2012 (2008 through 2012 for Potatoes and Sweet Potatoes; 2008 through 2013 for Stocks of Grain, Oilseeds, and Hay). These publications present final marketing year average (MYA) prices received by farmers and value of production for most U.S. field crops, fruits, and vegetables for 2007-2012, final field crop estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2008 through 2012, final estimates including revisions made by the Agricultural Statistics Board (ASB) for potatoes and sweet potatoes by season, State, and U.S. for crop years 2008-2012, and final stock estimates, including revisions made by the Agricultural Statistics Board (ASB) for the years 2008 through 2013. Data included in these final publications provide a historic record and a benchmark for current estimates.

For Crop Values, revisions resulted from field crop, fruit, or vegetable production estimates being revised for the period 2007-2012 due to additional survey or administrative data now available, including the 2012 Census of Agriculture. Most MYA prices for the period 2007-2012 have not changed since last published in Agricultural Statistics Board publications. Field crop revisions were made after a thorough review of original survey data and all additional data now available, including the 2012 Census of Agriculture. Other data series considered included United States Department of Agriculture farm program administrative records, shipment records, exports, and quantity processed information. Revisions to Potatoes and Sweet Potatoes were made after a thorough review of the original survey data and all additional data now available, including the 2012 Census of Agriculture. Other data series considered include Market News Service shipments, USDA farm program administrative records, import and export data, and NASS surveys of quantities processed. Stocks revisions were made after evaluating production revisions made by the ASB. The estimates shown herein are considered final and will not be revised again.
